Colette loved lavender and the walls of her room were a shade she mixed herself. Surrounding you with eternal healing and peace my dear....

“ *Colette, I miss you. So grateful to know you (will always know you even though you have left your body) and help in some small way through your life adventure. You proved the doctors wrong -- the five and a half years that you were blessed with defied their "two month" predictions. Thank-you for sharing and shining your bright light of love and courage. Your story and example have inspired so many thousands and will continue to keep you in this world through your video and story of creative healing. I know your boys and family are proud of you and your brilliant example of joy, belief and transformation. You are a hero for the ages and an angel of the highest degree.*

“ *I feel such a sadness as I come to terms with the news that Colette has passed, having only heard this news in the last hour. Colette and I were neighbour's and became friends, we enjoyed playing Dominoes, gardening and shopping and laughed a lot. Neville please accept our sincere heartfelt condolences, Colette was so much fun and I will think of her with a smile and a tear. Hugs to you and your family. Eugene and Zelda Thompson*
