

## Neil Robert Darvill

March 1, 2020

It is with great sadness we announce the sudden death of our beloved Neil at Credit Valley Hospital, Mississauga Ontario, on March 1st, 2020 at the age of 57. Born in Middlesex, England.

Neil suffered from end stage COPD and received a double lung transplant in 2018 at TGH. Over the last 6 months he suffered from chronic rejection and was awaiting a second lung transplant.

Cherished husband of Carrie. Survived by children; Zavia (Jack), Danielle, Ryan. Stepchildren Alex (Travis), Spencer (Megan), Mother Avis Tarry, Father Paul Edmonds-Riley (Christine), Brother Darren (Anna). In addition, Neil also leaves many friends and customers in Canada and the UK that respected and loved him dearly.

In respect of Neil's wishes-

Please give generously to the British Lung Association if you reside in the UK in his name-a tribute has been set up. In Canada, please donate to the Canadian Lung Association Research stream.

Neil will be cremated within the coming days. It was Neil's wish that there be no funeral service.

"If ever there is tomorrow when we're not together, there is something you must always remember. You are braver than you believe, stronger than you seem, and smarter than you think. But the most important thing is, even if we're apart I'll always be with you."

AA Milne

CD

“ Please know your heart and joy lives in all of us angel. We have surrounded ourselves with people that love us like you did. They have helped bridge us and survive without you these last 4 years. To our friends, work partners and those that love us, thank you. People in my life lately have dragged me into the life Neil would have wanted and I am so grateful. Its our world now, but we still look up in the sky trying to find you to help get us through the dark days and remember the utter joyful days with you and the profound lessons you taught us. We are, my Angel so grateful to you. Please know that. We see you in the sun, the moon and the stars. It's your world now  
My race is run  
I'm moving  
Like the setting sun  
No sad goodbyes  
No tears allowed  
You'll be alright  
It's your world now  
Even when we are apart  
You'll always be in my heart  
When dark clouds appear in the sky  
Remember true love never dies  
Glenn Fry

“ Neil Robert Darvill

November 29, 1962-March 1, 2020

*In memory of a shining light, lost to us a year ago today. A year without him in a pandemic, feels like a day.*

*When you have lost some one you love*

*Do not make the mistake of living in sadness or living small to honour their absence. You owe it to them to live even more vividly than before. If they could reach you, they would surely say-*

*“Take the love you had for me and turn it into gladness. Make my time on earth count loudly, so I have not lived in vain”.*

*Neil taught us how to value life, be who we are, appreciate the most extraordinary times of life, whether they were joyful or devastating, knowing how fragile life is.*

*He came back to us for a reason and we are so grateful for the years we had with him. He gave us so much joy and most importantly, taught us how to live.*

*He lives on in all of us.*

*Best friend and forever loved husband of Carrie Darvill (Walsh).*

*Loved and missed by his parents Paul Edmonds-Riley (Christine), Avis Tarry, joined in heaven with his Mother, Stella Edmonds-Riley (d 1962).*

*Missed by his beloved Daughter Zavia (Jack), adored Stepchildren Alexander Yeo (Travis), Spencer Yeo (Megan) and his cherished rescue fur kids Alfie and Miss Kitty. Much loved and missed by his in laws, other family, friends, and customers around the world.*

*Survived by his children Danielle, Ryan, brother Darren (Anna).*

*Neil died the same day as David Andrew Walsh-March 1st, 1999.*

*We are sure they are together today creating mayhem somewhere.*

*In Neil's memory, please donate to the Canadian Lung Association in his name today. Link below. Thank you in advance on behalf of his family and more important the millions living with chronic lung disease around the world like Neil did. It is the third cause of death in the world.*
