DD

“ I had the pleasure of working with Stew for several years at the Nestle Plant in Scarborough while I was the Engineering and Maintenance Manager. Stew was a key resource for the plant as he was responsible for the Boiler room and all other key services. Stew ran a tight ship. He took great pride in his work and he was particularly proud of how frugal he could be with the company's money. Even after his retirement, I called upon Stew on several occasions to help us out of a jam. He was always ready to lend a hand.

*I kept in touch with Stew via Facebook well beyond his working years and well after I relocated to Calgary.*

*Rest in peace Stew. I am a better man for having known you.*
